#### **I3D:bio OMERO user training slides**

#### **HOW TO USE THE SLIDE TEMPLATES**

- To use your institution's slide design and logo, adjust the slides of this presentation using the "slide master"
  - Note that these slides are optimized for 16:9 screen presentation layout
- Check the slides for yellow-marked text and insert the information according to your own institute's infrastructure.
- Feel free to use this material for videos, teaching, guidelines, etc., at your institute
- Please cite us (e.g., on page 1) when re-using this material or derivatives of it:

Adapted from: Schmidt C., Bortolomeazzi M., Boissonnet T., Fortmann-Grote C. *et al.* (2023). I3D:bio's OMERO training material: Re-usable, adjustable, multi-purpose slides for local user training. Zenodo. DOI: 10.5281/zenodo.8323588. If not stated otherwise, the content of this material (except for logos and the slide design) is published under <u>Creative</u> Commons Attribution 4.0 license.

## Research Data Management for Bioimage Data at the ADD INSTITUTE HERE

# Data organization: Search Function

ADD AUTHOR / RESPONSIBLE PERSON FROM YOUR INSTITUE

#### Tags and Key-Value Pairs in OMERO (recommendations)

## Tags and Key-Value Pairs can be added to:

- Images
- Groups of Images
- Datasets
- Projects

#### Tags are linked to users or groups

#### Advanced users:

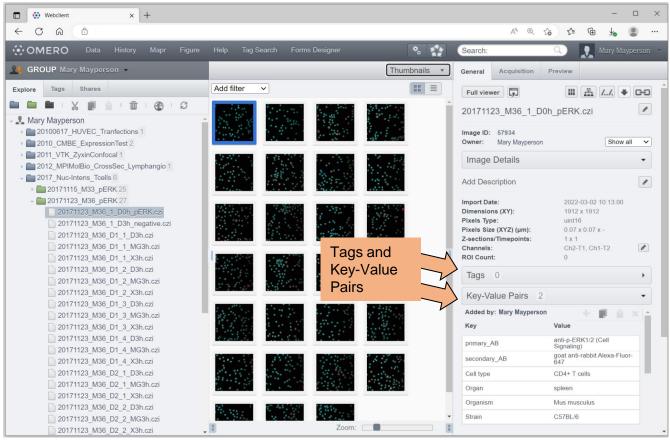

Annotate Tags and Key-Value Pairs using ontologies and ontology terms (see Chapter on Metadata Curation)

#### I3D:bio recommendation:

- Use tags for data organization across datasets and projects (categorization)
  - can substitute deep folder hierarchies
- Use Key-Value Pairs for metadata enrichment

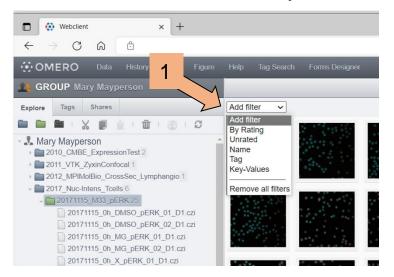

#### Tags and Key-Value Pairs (here: in OMERO.web)

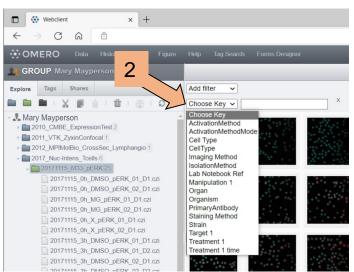

p 5

#### Filter Datasets for Tags and Key-Value Pairs (here: in OMERO.web)

At the Dataset-level, use filters to show a set of images based on Key-Value-Pairs or Tags

Example shown here: Filtering by Key-Values (also showing which Keys were used on this Dataset)

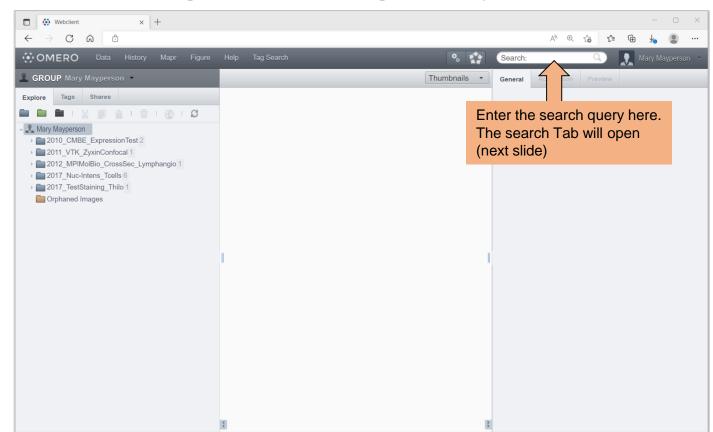

(You can also filter by Name or Rating)

#### Search function to find data, e.g., based on Tags or Key-Value Pairs 1/3

Use the Search field to look for data across

- Users
- Groups
- Projects
- Datasets

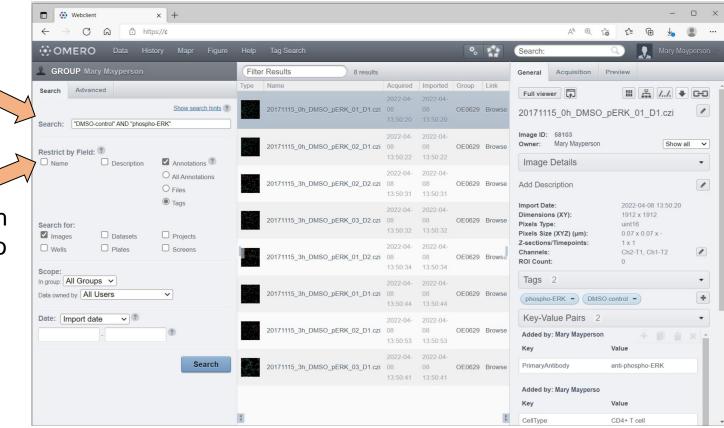

#### Search function to find data, e.g., based on Tags or Key-Value Pairs 2/3

Refine your search query

Optional:

Restrict for which fields you wish to search

Example 1: Search for images with both **Tags** 

#### Search function to find data, e.g., based on Tags or Key-Value Pairs 3/3

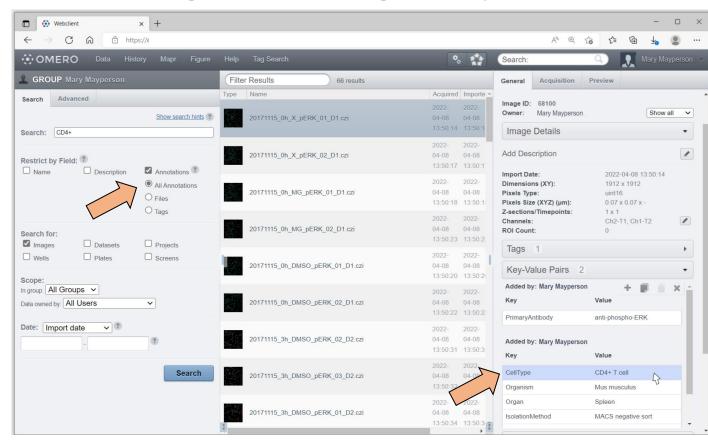

Refine your search query

#### Optional:

Restrict for which fields you wish to search

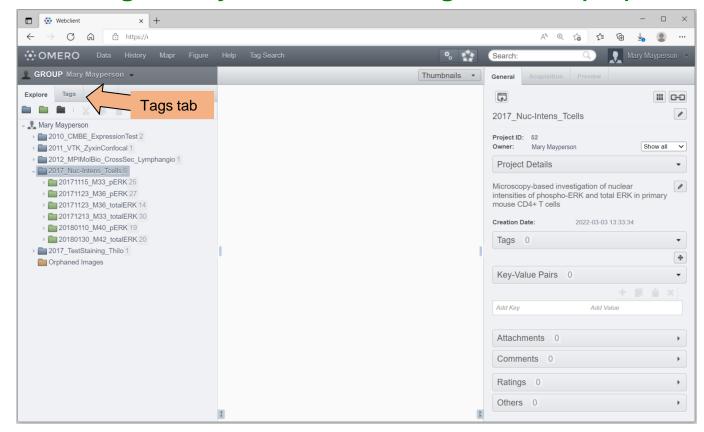

### Example 2: Search for images

with specific value in **Key-Value Pairs** 

#### No need to search – Use Tags for dynamic data re-organization (1/3)

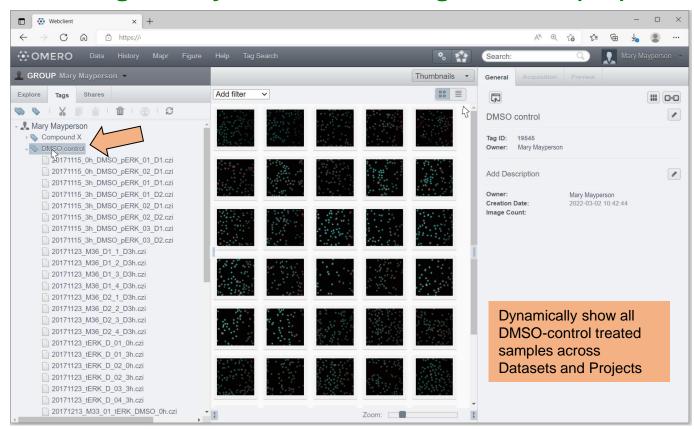

If you have annotated your data with Tags, use the Tags tab to view files based on the Tags

#### No need to search – Use Tags for dynamic data re-organization (2/3)

The Tags tab allows for a dynamically reorganized data-tree representation based on your Tags

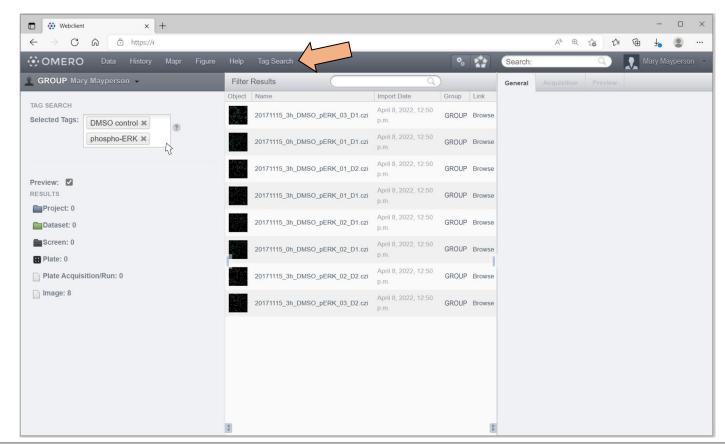

→ Advantage over deep folder hierarchies

#### **Using Tag Search (OMERO.webtagging extension)**

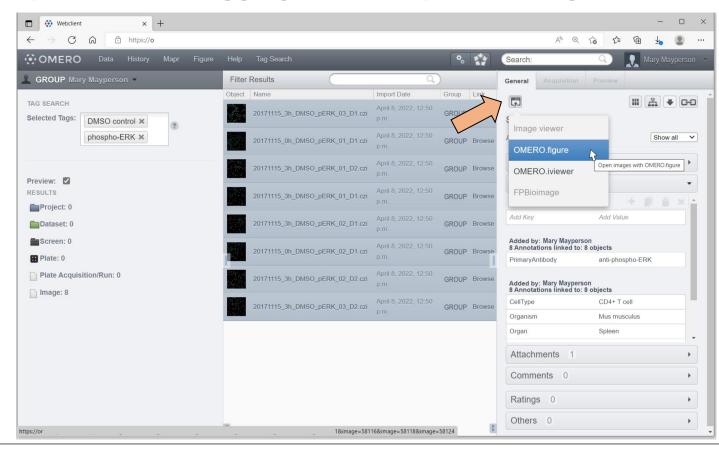

Tag Search allows combining tags (if it is installed)

Example:
Review all
images from
control-treated
samples for the
staining target
across
repetitions

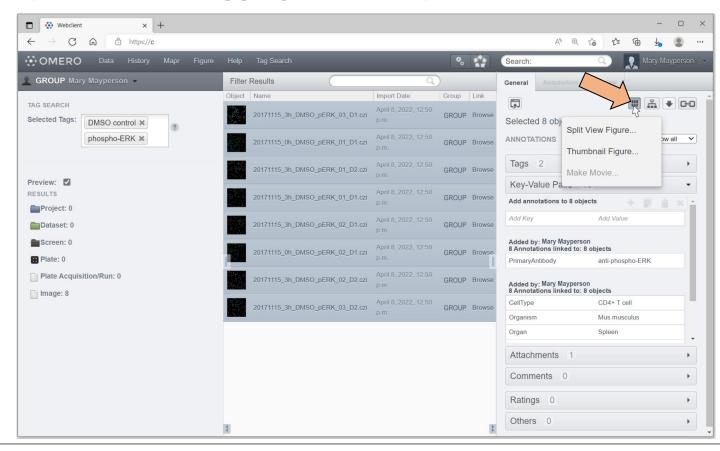

#### Using Tag Search (OMERO.webtagging extension) – create figures

Example:
Use the Tag
Search results to
prepare a
comprehensive
figure using
OMERO.figure

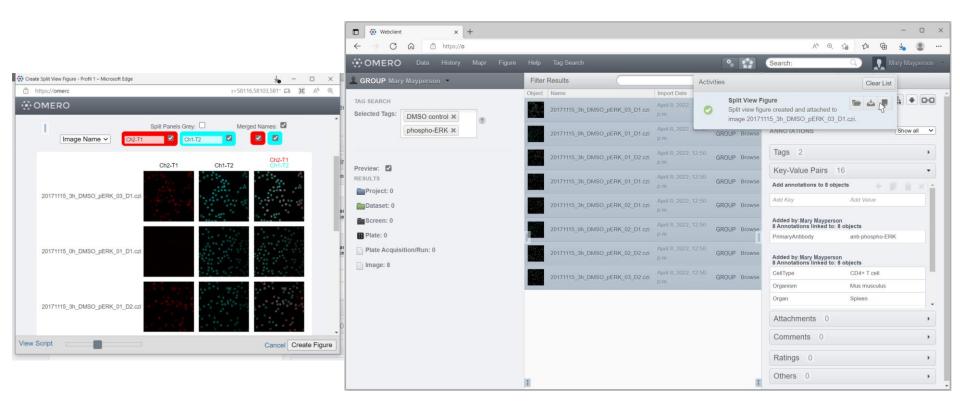

#### Using Tag Search (OMERO.webtagging extension) – quick split view

Example:
Use the Tag
Search results to
produce a quick
comparative
figure of the
Split View

#### Using Tag Search (OMERO.webtagging extension) – quick split view

#### More information on the search syntax in OMERO:

See the OMERO guides:

https://omero-guides.readthedocs.io/projects/introduction/en/latest/search-omero.html
